EDUCATION

SRM Institute of Science and Technology	2022 – 2026
B.Tech in Computer Science Engineering	CGPA: 8.5
Jawahar Navodaya Vidyalaya	2020 – 2021
Senior Secondary School	Percentage: 82.2%

SKILLS

Programming & Data Tools: Python, SQL, PostgreSQL, Excel
Data Analytics & Visualization: Data Analysis, KPI Tracking, Dashboarding (Tableau), Trend Analysis
Machine Learning: Supervised Learning, NLP, Feature Engineering, Model Evaluation
Data & Systems: REST APIs, Data Pipelines (n8n), Workflow Automation
Core Concepts: Data Structures & Algorithms, OOP
Professional Skills: Problem Solving, Communication, Team Collaboration

EXPERIENCE

Data Support Intern – Pure And Sure Health Hygiene Services June 2025 – August 2025

- Collected, cleaned, and maintained pharmaceutical sales and inventory data to improve accuracy and reporting consistency
- Monitored stock levels, expiry dates, and inventory movement to support tracking and reduce potential losses
- Built Excel-based dashboards and summary reports to track sales trends, stock availability, and key business metrics
- Organized and analyzed operational data to identify stock gaps, expiry risks, and inventory trends for internal decision-making

PROJECTS

Stress Analysis Using Multimodal Evaluation — Python, scikit-learn, NLP, OpenCV, CNN/ResNet

- Built a multimodal stress detection system using text, audio, and video inputs to classify stress into 3 levels: Low, Moderate, and High
- Trained separate models using TF-IDF for text, MFCC/RMS/ZCR for audio, and CNN/ResNet for video-based facial analysis
- Combined model outputs using score-level fusion, achieving around 80% accuracy and evaluating performance using F1-score, ROC-AUC, and confusion matrix

Supply Chain Analytics – AI Driven Analysis — n8n, PostgreSQL (Supabase), Quadratic

- Built automated data pipelines using n8n to process 13K+ daily orders and standardize large-scale operational data
- Analyzed **37K+ records** to identify delivery bottlenecks, revenue drivers, and customer trends for operational insights
- Developed KPI tracking (OTIF, fill rate, delivery compliance) to support data-driven decision-making in supply chain operations

Pothole Detection using YOLOv5 — OpenCV

- Developed a real-time hazard detection system achieving **89%+ accuracy** and ~24 FPS using optimized preprocessing
- Processed 50+ hours of road footage to improve detection reliability and model performance
- Enhanced precision through model and frame-level optimization for consistent real-time detection

PUBLICATIONS

Sentiment Analysis of Reddit Comments Using Machine Learning — IEEE AIC 2025

- Developed and evaluated ML and transformer models (Logistic Regression, Random Forest, SVC, XGBoost, LightGBM, BERT, RoBERTa) for text classification
- Processed and analyzed Reddit data using TF-IDF and class balancing techniques to improve model performance and reliability
- Achieved **89.6% accuracy** and **0.90 F1-score** through model optimization and comparative evaluation
- Highlighted applications in mental health detection, content moderation, and responsible use of AI in analyzing user-generated data

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Foundations Associate
- Google Analytics Certification – Google
- Machine Learning Foundations – AWS Academy
